

## Poly Diamond Court Maintenance Procedure

### Preparing Courts for Play:

1. Dust mop or sweep courts with fine broom to remove any debris.
2. Use a damp microfiber pad to clean court until the pad is not collecting dirt (may take 2-3 pads rinsing each as they get dirty).
3. Let dry and apply dressing. Poly Glide, Inc. has various dressings to provide desired speed which will not harm the playing surface.
4. Sweep up dressing after playing.

### Happy Shuffling!

### Monthly Maintenance:

1. Mix solution of 2 oz. of Poly Court Neutralizer to a gallon of water. Use a 4 gallon mop bucket and blended fiber mop.
2. Spread liberally on the court and agitate with mop.
3. Rinse well with clean water.
4. Squeegee off any remaining water.
5. Use a clean damp microfiber pad to dry court.

### Yearly Maintenance (Performed by Mitch Dean of Poly Diamond Systems):

1. Scrub courts thoroughly with propane powered hydra-diamond polishing machine.
2. Touch-up lines and numbers.
3. Re-polish with propane powered machine using 3000 grit diamond pads.
4. Re-densify. Heat densifier with propane powered polishing machine.
5. Apply Poly Ultra Spray Buff Treatment with 500 rpm buffer using 3m polish pad.
